3530 Warrensville Center Road
P.O. Box 201850
Cleveland OH 44120

Dear Mr. Collier:

Enclosed you will find two punches (.203 \emptyset) and two die buttons from the original MOM Tool trial here at WG Corporation. These punches have been in service since 7/26/2005, and have produced approximately 700,000 parts, of both 16ga and 18ga. I hope the study of them will be useful to you and your engineers. We have since serviced the die and replaced all the punches and buttons using your product. I will keep you posted with our progress with these tools. You can rest assured that everyone here at WG is extremely satisfied and in many cases amazed by the performance of your tools.

Best Regards,

Stephen P. George
Process Engineer
